React/Redux  
Handlebars.js  
Materialize / Bootstrap  
Adobe Suite / Wireframing

### Other

Git (Git Flow)  
Version Control Software  
SCRUM / Agile  
Visual Studio

## #Front-End & Full-Stack Projects

**iiMage** | <https://github.com/CristalGomez/Project3> | <https://fierce-hollows-73170.herokuapp.com>

↳ Developed a full-stack web-app in a small group. iiMage is a photo sharing and storage platform. Additionally, photographers offer their professional services to clients by communicating through the email feature on their profiles. Made with React.js, MongoDB, Express.js, Node.js, Anime.js, and Adobe Illustrator.

↳ Used Adobe Illustrator to design the framework of each web page, structured a no-SQL database for the website using Mongo, built the ORM, and implemented an email feature on user profiles using SendGrid.

**DrinksOnUs** | <https://github.com/CristalGomez/Project2> | <https://dry-savannah-14331.herokuapp.com/>

↳ Collaborated with a small group to develop a full-stack website that served as a forum page. Users can leave comments on their favorite local bars in three different cities and given the ability to create a forum for their bar if not already listed. Made with Handlebars.js, Node, Express, MySQL, Sequelize, Adobe Illustrator, and Anime.js.

↳ Scripted front-end features with jQuery, designed each web page with Adobe Illustrator, built UI using Handlebars.js, and created animations using Anime.js.

**MyMenu** | <https://github.com/HaifaSeyam/project-01> | <https://haifaseyam.github.io/project-01/>

↳ Collaborated with a small group to develop a front-end web-app that used two APIs to give users recipes for cocktails and meals based on ingredients they've selected. Made with HTML, CSS, jQuery, Materialize, Yummly API, and CocktailDB API.

↳ Coordinated closely with the CocktailDB API to give the user a recipe on the cocktail recipe section of the website.

↳ Refined the API key by creating functions and writing loops that protected the user from receiving any null responses.

## #Work Experience

### Bath & Body Works | Sales Leadership Team Member

January 2019 - Current: Pearland, TX

↳ Personalize – Drive sales by up-selling products based on the customer's past purchases and preferences.

↳ Teach – Coach sales associates on how to up-sell and cross-sell, set goals aligned with their ability, and encourage associates to have engaging conversations with customers to increase brand loyalty.

↳ Manage – Manage shipment, payroll management, balance register tills, opening and closing the store, and creating merchandise displays.

## #Education

**University of Texas Coding Bootcamp** | Certificate in Web Development

November 2018 – May 2019: Houston, TX

**Texas A&M University** | Bachelor's of Science in Psychology

August 2015 – May 2018: College Station, TX
