Education

University of Texas Coding Bootcamp, Houston, TX   2018-2019
-    Certificate of web development

Texas A&M University, College Station, TX   2015-2018
-    Bachelor's of Science in Psychology, Minor in Neuroscience

Projects

iiMage | github.com/CristalGomez/Project3 | fierce-hollows-73170.herokuapp.com
-    iiMage is a group-collaborated full-stack web-app that served as a photo sharing and storage platform. Additionally, photographers are able to offer their professional services to clients. The web-app allowed both photographers and clients to build a profile that served as a library for their photos and as a way to interact and collaborate with each other.
-    As the project manager I approved changes to the master branch, updated the Kanban board on Github, designed each web page with Adobe XD, and deployed the project to Heroku. Additionally, I built the database, the ORM, and the email feature on the user profiles.
-    Made with React.js, MongoDB, Express.js, Node.js, Anime.js, ReactStrap, SendGrid, and Adobe XD.

DrinksOnUs | github.com/CristalGomez/Project2 | dry-savannah-14331.herokuapp.com
-    DrinksOnUs is a group-collaborated full-stack web-app that allows users to contribute to the happy hour forum of their favorite bars based on their location. Users are able to leave a comment with information about the latest happy hour special. This web-app takes the work off the restaurant owner and web developer from constantly updating the specials.
-    Wrote the front-end JavaScript and built the UI using Handlebars.js.
-    Made with Express.js, Node.js, Handlebars.js, Sequelize, MySQL, Anime.js and Adobe Illustrator.

MyMenu | github.com/HaifaSeyam/project-01 | haifaseyam.github.io/project-01/
-    MyMenu is a group-collaborated front-end web-app that used two API calls to give users recipes for cocktails and meals based on ingredients they've selected.
-    Responsible for writing JavaScript for the API call used for the cocktail recipe feature of the website.
-    Made with HTML, CSS, jQuery, Materialize, Yummly API and CocktailDB API.

Technical Skills

React.js	Node.js	
Handlebars.js	Express.js	MySQL
Materialize	JavaScript	Sequelize
Bootstrap	jQuery	MongoDB
HTML	ES6	GIT
CSS	JSON	Github
	API	Heroku
	Firebase
