Professional Summary

Full-Stack Web Developer with a background in Psychology and a life-long dedication to improving technology. Versatile team player with success in creating MERN stack applications and in cross-team collaborations. Efficient at combining creativity with clean code in order to build user-friendly applications.

Technical Skills

- React.js, Node.js, Express.js, Handlebars.js, MySQL, Sequelize, MongoDB, Firebase, APIs, AJAX, JSON, Materialize, GIT, Github, Heroku, JavaScript, jQuery, HTML and CSS

Projects

iimage: Project 3 | github.com/techman98/iiMage | fierce-hollows-73170.herokuapp.com

- iimage is a full-stack application that served as a platform for creators to offer their photoshop skills to their clients. The website allowed both creators & clients to build a profile that served as a library for their photos and as a way to interact and collaborate with each other.
- Served as the project manager for the group. Approved changes to the master branch, updated the Kanban and deployed the project to Heroku. Additionally, I built the Mongo database and ORM.
- iimage was made with React.js, MongoDB, Express.js, Node.js, Anime.js, Material UI and Adobe XD.

DrinksOnUs: Project 2 | github.com/CristalGomez/Project2 | dry-savannah-14331.heroku.com

- DrinksOnUs is a full-stack application that served as a forum. The application allows users to contribute to the happy hour forum of their favorite bars based on their location.
- I contributed by writing the frontend JavaScript and building the UI using Handlebars.js
- Made with Express.js, Sequelize, Handlebars.js, Anime.js, Adobe Illustrator and Heroku

MyMenu: Project 1 | github.com/HaifaSeyam/project-01 | haifaseyam.github.io/project-01/

- MyMenu is a frontend website that used two API calls to give the user recipes for cocktails and meals based on ingredients they selected.
- My role included building the API call for the cocktail recipe portion of the website using the cocktailDB API.
- Made with HTML, CSS, jQuery, Materialize, Yummly API and CocktailDB API.
